WASHINGTON, November 22.—An important opinion on the construction of section 3 and 5 of the act of March 3, 1887, granting and to provide for the adjustment of land grants made by congress to aid in the construction of railroads, and forfeiture of unearned lands and other purposes, is made public to night. The opinion is given in reply to questions asked by the secretary of the interior. The opinion in substance is as follows: The first section of the act named directs the adjustment of grants. The question submitted under this section was, "What class of purchasers is referred to by the expression bona fide purchasers of such unclaimed lands?" The rights of the several classes to the lands referred to in the section are successive in the order stated therein. The first right is that of the homestead or pre-emption settler whose claim has been wrongfully cancelled. JOB WORK

The trans. manager of the Colorado Pacific road states that his road is hauling one rock for building purposes that we ... It is only very recently that we ... have recognized the value of our quarries. It is not unlikely that a few years from now we shall be furnishing building stone for the use ... all the way to the Missouri river. Our ... large part of the coal consumed between here and the Missouri river. The railroads are just beginning to appreciate this fact, and all of them are planning extensions to the coal fields. In a few years the tonnage of coal going east of Colorado will fully equal the tonnage of all kinds of material brought into the state. We are likely to produce more gold and silver in the future than we are producing now, but this single product is yearly increasing in importance as compared with other industries which are being developed. The tremendous growth in the business and population of the state in the last three or four years is due almost entirely to industries other than mining.

Senor Tenor Amero, agent of the Colombian government, has just published his report on the Panama canal. It is perhaps the most responsible utterance yet made on the subject, and presents a very discouraging view. According to this report, to build the ... it was necessary to excavate ... up to the first of August, this year, ... cubic ... to be excavated. The cost of this work has been in round numbers ..., 000,000. The work ... is ... expensive ... that which remains. It is estimated that not less than $100,000,000 more will be necessary to complete the work. The new ... all ... at a ruinously high rate of interest. The cost of general management and interest now amounts to ... twenty millions annually. ... funds are not ... so low that it will require much more than six hundred millions to be able to finish the work. The conclusion arrived at by this agent is that the canal will never be finished by this company.

Mr. Edward Atkinson, the distinguished statistician, has suggested a novel plan for the settlement of the fishery dispute ... States should purchase Nova Scotia, New Brunswick and Prince Edward Island, paying for them fifty million of dollars. Mr. Atk... has corresponded with some ... and his ... answer has been given to the proposition. The amount of money paid is fixed on the basis of the Canadian national debt. This amounts to about fifty dollars per capita, and these provinces have about one million population. It would only require about five or six months' surplus to pay for them, and we should not feel the burden. The money would be a great help to Canada just now, because she needs it to finish her Pacific railroad. The great trouble in carrying out this scheme will be to obtain the consent of Great Britain. England never sells, but buys. During the last century she has increased the extent of her colonial possessions some ten times, and it will be difficult to induce her to change this policy. But the provinces are not much of a section to her, and their sale to the United States would be a very happy solution of a question which will probably never be satisfactorily settled while these provinces and the United States are under different governments.
